Subject: Raw VIPER Data for new HTC/NFB Gamma Scans
083850.000.csv

Good morning,

Please see the attached .csv file containing the gamma scan readings in Kc/min that I collected last week, a column can be added with a the conversion to MicroR/hr and then I can incorporate this into our existing gamma scan data. This data is for both HTC and NFB. Please let me know if you have any questions or concerns, thanks!
